Elevator Fixtures

THE FIXTURES YOU SHOULD EXPECT

Elevator fixtures have the biggest impact on your passengers' riding experience.

More than just an interface, fixtures have become an accent piece to the cab interior finish.

Don't settle on the ordinary... **expect more**

CAR OPERATING PANELS

SAVOY COLLECTION

The Savoy Collection is an economical fixture solution encompassing the BL & BD pushbutton line.

With the Savoy Collection you can combine push button and Braille options to achieve the desired effect.

Any pushbutton style

Plate Finish

Stainless Steel

SS#4 COP shown with 4.3" Giotto TFT PI, BS Classic pushbutton, Savoy surface mount tactile, 2010 fire service upgrade provision and surface mounted switches.

JULIUS COLLECTION

The Julius Collection offers a low-profile pushbutton and tactile / braille combination that is both attractive and cost-effective.

The lack of any hard edges combined with our positive stop pushbutton, makes the Julius Collection one of the most vandal-resistant products on the market.

Through a combination of different material finishes, pushbutton styles and LED illumination, the list of possibilities with the Julius is virtually endless.

OPTIONS

SS#4 COP shown with 7" Giotto PI with custom graphics, BS classic pushbutton, Julius surface mount tactile and surround, 2010 code with a service cabinet.

CAR OPERATING PANELS

CAESAR COLLECTION

The Caesar Collection is the first of its kind in the elevator market, with retro-illuminated tactile it will set your facility apart from all others in design and functionality.

Conceived as a solution to improve the passenger interface (car operating panel) in poor ambient lighting conditions, the ADA compliant tactile character is illuminated 24/7.

OPTIONS

Illumination		Red	Green	Blue	White
Tactile		Stainless Steel, PVD Bronze with blue, white or no illumination. Black with white illumination

Plate Finish		Stainless Steel			

SS#4 COP shown with 10" Matisse TFT PI with custom graphics, BS Moon pushbutton, Caesar white illuminated tactile, 2010 code with service cabinet.

DUNE COLLECTION

The Dune Collection is the offshoot of the Caesar Collection using a square vandal resistant pushbutton as opposed to round. The other identifying feature is the actual pushbutton face has a convex shape which gives it a very contemporary look and feel.

The Dune Collection is the newest addition to the MAD pushbutton family and makes for an ultra-attractive modern solution that will differentiate your facility from any other.

CAR OPERATING PANELS

COLOSSUS COLLECTION

The ultra-large pushbuttons from the Colossus Collection serve a unique application. The large surface area (or pressel) on the push button is easy to see and activate, which makes it very appealing to those individuals with impaired vision, tremors or like disabilities.

Typically the Colossus Collection is tailor-suited to public facilities, including but not limited to, airports, hospitals, and sporting venues.

CALIFORNIA COLLECTION

Our fully code compliant California Collection features the Atoll button.

Like an Atoll, a ring-shaped coral reef that encircles a lagoon completely, the button is comprised of a stainless steel ring surrounding a plastic fully-illuminated bezel.

The California Panel has evolved as a trendy design sought out by architects and designers across the continent, not only to comply with code, but also to improve the aesthetic in the cab.

SS#4 COP shown with 10" Matisse TFT PI with custom graphics, Atoll pushbutton, California Julius flush tactile, 2010 code with service cabinet.

CAR OPERATING PANELS

PLAZA COLLECTION

The Plaza Collection offers an elegant solution for facilities (hotels, condos, class A commercial) where a high number of floor call buttons are required in a relatively compact space.

While the Plaza Collection was conceived as a resolution to a unique issue (maintain ADA heights with high floors buildings) the aesthetic has caught on and is used in standard applications as well.

This design has proven very popular in the greater New York market.

Oil Rubbed finish COP shown with 7" Matisse TFT PI, BP Classic pushbutton, Plaza Slimline flush mount tactile, Attendant Service, 2000 code with service cabinet. Additional Features: Flush Cam Lock and Card Reader Lens.

RITZ COLLECTION

The Ritz Collection offers a nostalgic look to the elevator interior. By using an adjacent "pin-mount" tactile/Braille, the net effect is one of sheer elegance.

The appeal is largely accomplished via the overall look of the operating panel and the attention to detail that is inherent in its design. As each tactile character and each Braille pin is set individually in the car station, it has a craftsmanship quality that cannot be duplicated by other methods.

CAR OPERATING PANELS

GLASS

Contemporary glass fixtures are becoming a popular alternative to traditional Stainless Steel car panels. Finally builders, architects and interior designers can bring the building's design not only into the elevator interior, but into the fixtures as well.

Our new prestigious Glass fixture line ties the modern and innovative concepts together. Its sleek look and functionality will be a great accent for your newly refreshed elevator interior.

CAR OPERATING PANELS (RETROFIT KIT)

IMPULSE

The Impulse retrofit kit is designed for the Dover Impulse hydraulic elevator fixture.

A direct retrofit replacement means no dimensions or measurements to worry about, no cutting or complex installation methods.

The end result is a quick installation that minimizes your elevators down time, while upgrading your fixture to a more reliable vandal proof design.

The Impulse Retrofit offers a turn key solution while improving the elevator's reliability.

OPTIONS

Buttons/Tactile All buttons/Braille tactiles available

SS#4 COP shown with 4.3 Giotto TFT PI, BS Classic pushbutton, Julius surface mount tactile and surround, 2000 code with surface mount service key switches.

CAR OPERATING PANELS (MODERNIZATION KIT)

GILDA

The Gilda Surface Mount Panel is a bold initiative and revolutionary concept that allows building owners to upgrade their elevator fixtures faster while minimizing down time.

The 15/16" deep car station can be manufactured at varying widths and lengths to accommodate whatever site conditions might exist.

The most salient feature of the Gilda is that there is no need to enlarge the car station opening in order to accommodate the new unit.

In a climate of escalating labor costs and shorter lead times, the Gilda Surface Mount Panel offers a real world solution.

OPTIONS

Buttons/Tactile All buttons/Braille tactiles available

HALL FIXTURES

HALL STATIONS

Our Hall Station collection is crafted with a quality that cannot be replicated. With numerous options we can match the look and feel of the building design and guarantee quality and compliance with the elevator and building code.

By offering a fully customizable experience we can provide different types of material such as stainless steel, bronze and glass with different mounting options.

Don't limit yourself, design the fixture your building deserves.

DESTINATION DISPATCH

DOOR-IN-DOOR SOLUTION

The Door-in-Door Solution allows a single set of push buttons to be used for both fire and regular service. The inner door acts as the service cabinet providing access to both the button and service keyswitches, while the outer door provides additional access to the fire service controls.

TTG DESTINATION SOLUTION

Upgrade the Destination Dispatch COP with a Touch-To-Go touchscreen. While in destination mode, the TTG screen can act as a next-destination indicator, a digital signage board or used for 2-way video. In independent or fire service mode, the screen will automatically change allowing the passenger to select destination floors, eliminating need for 'hidden' mechanical push buttons.

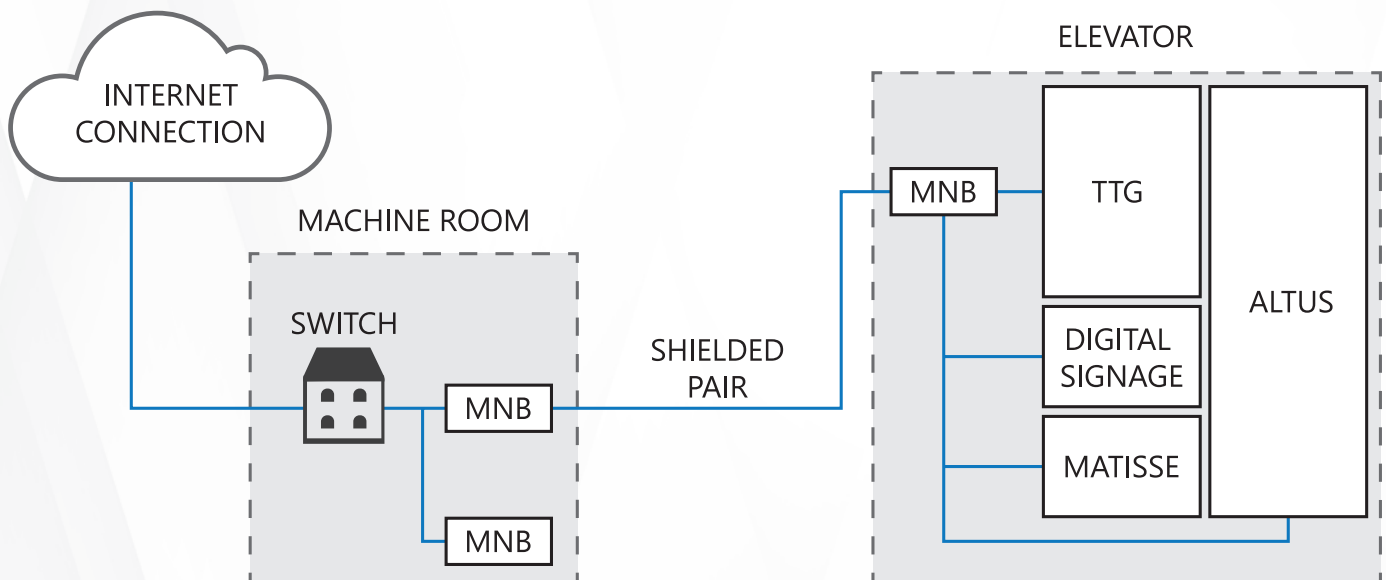

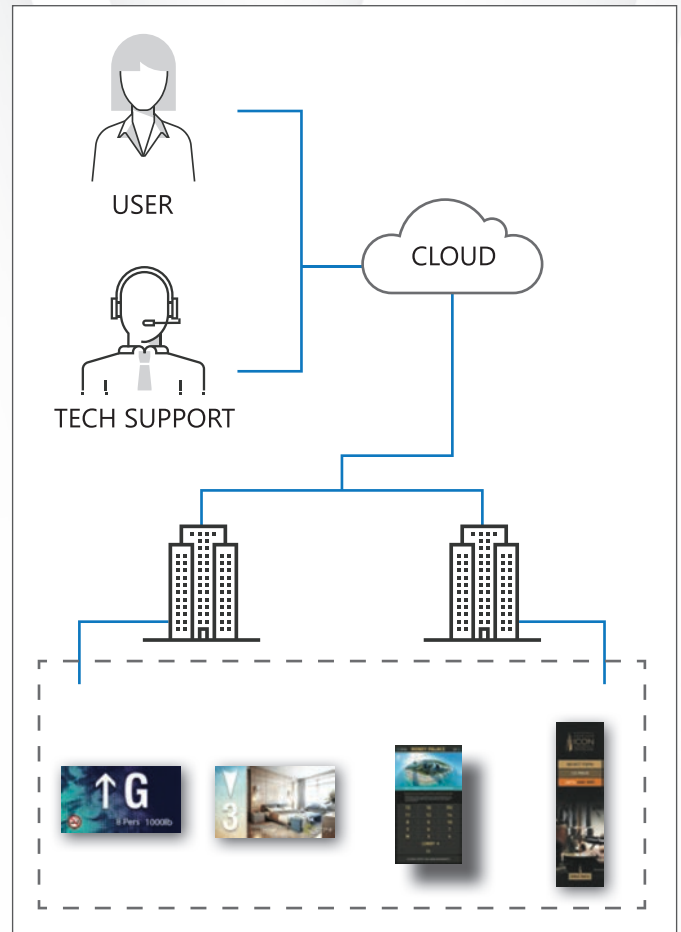

MANAGEMENT SOFTWARE

MosaicONE

One software to manage all devices – MosaicONE is a cloud-based software that allows a user from any location with an Internet connection to update and manage networked devices from Lift Solutions.

The theme designer allows you to create or edit the displays whenever and wherever you want! You can do it all yourself, or delegate responsibility to other users.

- ✓ Pictures & Slideshows
- ✓ Time & Weather
- ✓ News & RSS Feeds
- ✓ Local & Streaming Video
- ✓ Position Indicator
- ✓ Per Floor Messaging
- ✓ HTML Coded Content
- ✓ Full Scheduling
- ✓ Hardware Status Tracking

MNB = MAD Network Box

WHAT CAN YOU EXPECT?

Manage all your devices from one browser login. With just a few clicks, schedule important notices days, weeks or months in advance for display at the assigned time on the appropriate day.

The easy-to-use platform enables you to create powerful digital signage using any type of content. Design, preview and publish your content from anywhere at any time. Notices can include events, directories, images, news feeds, weather, video, and more!

SIMPLE AND CONVENIENT USER INTERFACE

- ✓ Matisse
- ✓ Altus
- ✓ Touch-To-Go

POSITION INDICATORS

MOSAIC

Redefine your elevator with a modern Position Indicator.

Matisse: The Premium option available in the TFT designer's series. Featuring a fully networkable unit with widgets, news, two-way video capabilities and live video streaming. It is available in 7", 10" & 15".

Giotto: The mid-range of the new TFT designer series with its multicolor graphic Position Indicator. Available in 4.3" & 7".

Raffaello: The micro version of the three balances both cost and functionality. Perfect for integrating Position Indicators in your hall fixtures design or lobby panels. Available in 2".

- ✓ High resolution & fully customizable graphics
- ✓ Integrated voice annunciator
- ✓ Two-Way video capable (Matisse)
- ✓ Programmable audio and video messages
- ✓ Self administration with easy-to-use Mosaic software

All Available sizes listed above

LARGE FORMAT POSITION INDICATOR

ALTUS

Combining the Mosaic PIs, Matisse Digital Signage and Touch-To-Go's interactive graphics, the Altus is large enough to take advantage of all the functionality in one.

- ✓ Remote admin and updateability
- ✓ Fully customizable
- ✓ Weather Widgets, social media, news (RSS feeds), videos, online photo albums, and HTML content
- ✓ 'This Floor' interactive messages

SS#4 COP shown with 48" Altus PI, Dune pushbutton and Surround with Cast Tactile

TOUCHSCREEN COP SOLUTION

TOUCH-TO-GO

Using vibrant, easy-to-read, color touchscreens linked to a custom control system, our elevator touchscreen systems eliminate the limitations of traditional elevator pushbuttons.

Create a distinctive experience that will have a high impact on the passenger and enhance the usability of the elevator.

- ✓ Easy-to-clean surface
- ✓ Remote admin and updateability
- ✓ 21" HD LED display with a viewing angle of 178 degrees
- ✓ Multiple screen sizes available
- ✓ Fully customizable and easy to clean
- ✓ Vandal-resistant & code compliant
- ✓ Operated with finger touch or with a gloved hand (fire service)
- ✓ Images, Video, live video, live news ticker, weather and 2-way video capable
- ✓ Interface with any elevator controller

SS#4 COP shown with 10" Matisse PI with custom graphics, BS classic push button, Caesar surface mount non-illuminated tactile, ADA compliant flush mount key pad, 21" Touch To Go Touch Screen, 2010 service code with service cabinet.

Upgrade Your Traditional Pushbuttons. Add a fully-interactive, customizable feature to your premium cab interior. Our elevator fixture's unrivaled touchscreen replaces the outdated elevator pushbutton, allowing for changes to graphics on an as-needed basis.

RESIDENTIAL

Brand your elevator and keep your residents informed with message boards, which can be automatically scheduled to update. Change the displays for special occasions such as holidays or events.

Architectural renderings can be incorporated into the graphics. A crisp building graphic identifies destination floors when selected, letting passengers visualize where they are going within the building. Instructions can also be added to the screen (e.g. scan access card).

COMMERCIAL

Give your guests discount offers and promote your products or services right inside your elevator!

Providing tenant names and descriptions assures visitors that they are headed to the correct floor, while also promoting the corporate identity of each tenant and of the building.

Commercial jobs can include hospitals, universities, malls, stadiums, libraries and museums.

HOTELS & AIRPORTS

Promote the identity and image of the hotel through your graphics. The touchscreen provides an effective means of highlighting building features and commonly used services (pool, spa, restaurant, etc) with pictures.

The wayfinding feature allows you to introduce information about your building's layout and help guests figure out their path once they exit the elevator.

For more info, visit www.touchtogo.ca or www.liftsolutions.net

DIGITAL SIGNAGE

The Matisse digital signage brings the elevator notice board into the 21st century. Using customized top-of-the-line LCD screens and software suites, the Matisse digital signage can suit virtually any foreseeable need.

Software: All Matisse come with MosaicONE software to create powerful digital signage for any content at anytime.

- ✓ Pictures & Slideshows
- ✓ Time & Weather
- ✓ News & RSS Feeds
- ✓ Local & Streaming Video
- ✓ HTML Coded Content
- ✓ Full Scheduling
- ✓ Hardware Status Tracking

Flush Mount available in: 10", 15" & 19" can be positioned landscape or portrait.

Surface Mount available in: 15"

SS#4 COP shown with a 10" Matisse digital signage screen, 7" Giotto PI, BS classic push button, Julius surface mount tactile and surround, 2010 code with a service cabinet.

VIDEO WALL

Promote the identity and image of the hotel through your graphics. The touchscreen provides an effective means of highlighting building features and commonly used services (pool, spa, restaurant, etc) with pictures.

The wayfinding feature allows you to introduce information about your building's layout and help guests figure out their path once they exit the elevator.

- ✓ Interactive content with real-time elevator movement and operation
- ✓ Integrate the Position Indicator
- ✓ RSS feed capability (Weather, News, etc.)
- ✓ Fully customizable content to meet project experience
- ✓ Commercial full 1080p screens
- ✓ Proprietary interface for interaction with elevator controller
- ✓ Designed specifically for elevator use
- ✓ Orient displays at any angle
- ✓ Engineered and manufactured to your specific project requirements

1. Position Indicator 2. Next Floor Feature 3. Customizable Content

Example layout configurations.

Fully customizable.

TWO-WAY VIDEO COMMUNICATION

Our Concierge system allows for the passenger to communicate with the Concierge/Security staff via a two-way video system.

The elevator is equipped with a high resolution pin-hole camera. Similar to the elevator camera pin-hole system, the Concierge / Security desk will have a panel where they can activate the camera and indicate the two-way video communication.

The Concierge system is fully integrable with the Matisse TFT display or with the Touch-To-Go touchscreen system.

- ✓ Fully customizable
- ✓ Live video
- ✓ High Definition
- ✓ Finger touch capability
- ✓ Fully integrable with the TFT Matisse display and Touch-To-Go touchscreen
- ✓ Advanced Attendant Service functionality

SS#4 COP shown with 10" Matisse PI, BS classic push button, Caesar surface mount non-illuminated tactile, ADA compliant flush mount key pad, 21" Touch To Go touchscreen, 2010 service code with service cabinet.

TWO-WAY VIDEO COMMUNICATION

1 The Concierge / Security can monitor inside of elevators via live video feeds and dispatch elevator to desired floors with advanced attendant service.

2 When an emergency call is activated from within the elevator, the live video feed from that elevator automatically enlarges allowing concierge to quickly see what is happening in the elevator.

3 When Concierge / Security activates the 2-way video, live video of the Security/ Concierge is streamed into the elevator and displayed on either the Touch-To-Go touchscreen or Matisse TFT display.
