

## FLEXIBLE COUPLINGS & ADAPTORS

### HOW IT WORKS

Poly-Disc® Flexible Couplings addresses all four types of motor misalignment: Axial, Angular, Parallel and Angular/Parallel.

## CURE YOUR MOTOR TRAMMING HEADACHES

Unique, Taper-Lock® Bushing provides motor shaft attachment that is simple and secure yet easily repositioned.

With Existing Pin-Type Couplings (Dover, Otis) we can provide a new OEM modified “will fit” motor side coupling to adapt to standard NEMA “C” face motors - no custom shaft required.

### ADVANTAGES

- Stop Runaway Labor Hours
- Use in-stock NEMA “C” face Motors for Faster, Lower Cost Repairs
- Assure Long Motor Life
- Reduce Installation Time
- Conquer Vibration
- Protect New Motor Bearings
- Custom Flange & Coupling Sets Available

## FOOLPROOF MOTOR COUPLING

Don't Walk Away without Alignment Assurance™
