

# CABLITE® Eco-Friendly LED Lighting for Elevators

**CABLITE® LED lighting is energy efficient, cool, and environmentally responsible lighting technology for passenger, freight and residential elevator cabs.**

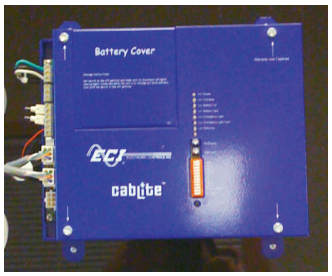

CABLITE® high output, long life low voltage LED downlights are teamed with a microprocessor-based control unit to provide general interior lighting and emergency elevator cab lighting to exceed ANSI A17.1 requirements.

CABLITE® replaces fluorescent, halogen and incandescent lighting for modernization and new construction, eliminating excessive energy use, heat in the cab, and frequent bulb replacement – not to mention improved green performance.

## CORE CABLITE® ADVANTAGES

- **Reduces Energy Costs by 80%** or more vs conventional lighting methods.
- **3.7 watts** per downlight assembly.
- **Short term payback** vs. halogen and other lighting types.
- **Easy Upgrade for Existing Lighting** with low profile design and optional adapters and reducers.
- **Plug & play design** speeds installation.
- **Smart Microprocessor** controlled lighting system offers unique features/options.

## ENERGY SAVINGS

- **Substantially Reduce Lighting-Generated Heat** and associated cooling costs.
- **Idle Cab Dimming** can reduce energy use another 50% or more.

## EMERGENCY LIGHTING

- **Superior Emergency Lighting** – exceeds elevator code requirements.
- **Emergency Downlights** selectable through DIP switches.
- **Replaces COP Emergency Lighting** and associated bulb and battery maintenance.

## OTHER BENEFITS

- **Five Year** limited warranty.
- **Meets all ANSI code** requirements for lighting, emergency lighting and signaling.
- **Choose Cool Bright or Warm White LEDs**.
- **Adjustable Brightness**.
- **Vandal & Vibration Resistant**.

## REDUCES MAINTENANCE COSTS

- **Astounding 100,000 hour life** expectancy; forget about bulb replacement for the next decade.
- **No ultraviolet light** transmission – cab interior finishes look better longer.

## ECO-FRIENDLY GREEN PRODUCT

- **Green Aware™** Reduced carbon footprint.
- **Contains No Mercury** or hazardous waste.
- **Established recycling program** returns spent cores for recycling.
