Lift Solutions Elevator Interiors

Lift Solutions Elevator

Your Best Source for Distinctive Elevator Cab Interiors

Lift Solutions supplies top quality elevator cabs, doors, entrances, and fixtures to the country's major elevator companies.

Lift Solutions' team has been serving the needs of OEM's, independent elevator companies and property owners – for both new construction and modernization for over 30 years.

A Legacy of Fine Cabs

Lift Solutions elevator cab projects are an impressive roster of commercial real estate properties, developers and owners including:

- **Empire State Building**
- **30 Rockefeller Plaza**
- **Trump World Tower**
- **Marriott Marquis**
- **Stuyvesant Town**
- **And many others**

Go with Expertise

Lift Solutions teams with companies with decades of engineering and design experience,impressive project histories, and fully equipped manufacturing facilities. This distinguishes a team that can handle any project, large or small.

Lift Solutions is ready to satisfy your aesthetic and economic requirements for cabs, entrances and fixtures with the convenience of single source manufacturing.

About Our Work

Capabilities and Expertise

Our manufacturing team includes highly skilled engineers, sheet metal mechanics and carpenters who average 15+ years' experience in their respective trades.

Excellence in customer satisfaction drives our people to provide personal attention to every detail.

Our Goal

Our shared goal is to partner with customers to create distinctive solutions that enhance aesthetic appeal, deliver reliable functionality, and deliver a design statement and finishes appropriate to the building.

Care is always taken to assure that **Lift Solutions** cab interiors comply with all accessibility requirements and local codes.

Same Plant, Same Finish

Lift Solutions has seamlessly integrated the production of cabs, entrances and fixtures.

By using single plant sourcing, you receive better results at lower cost. Finishes aren't just similar, they are identical. Swing panel material matches cab walls, cutouts are highly accurate, and close tolerance or depth problems are eliminated.

Get Started

Creativity Driven by Function + Aesthetics

At **Lift Solutions** we merge high-end materials and architectural design to create affordable custom luxury elevator interiors.

This patented process delivers serious savings, allows projects to move promptly to and through manufacturing, improves scheduling reliability, and minimizes building disruption. Finished materials can be installed by any qualified elevator contractor.

We believe elevator cabs can be leveraged as assets to improving image, garner prestige, and increasing building occupancy. If your architect or design team can dream it, we can build it.

Customizable Options

Wide Range of Materials, Surfaces and Finish Options

Select from a wide range of stone, ceramic tile, glass, exotic as well as conventional wood species, metals including bronze and stainless steel, and more. All materials are sourced from proven suppliers and are subjected to rigorous quality checks before fabrication begins.

Wall materials can be complimented by ceiling choices ranging from drop ceilings to architecturally customized installations using a rich palette of materials. Most clients select recessed down lighting, perimeter and indirect lighting options that add impact and drama to their cab interior. An expanding range of energy efficient lighting options is now available to satisfy the most rigorous requirements.

Add any type of handrail to coordinate or contrast with your cab interior. Handrails need not just satisfy functional requirements but – with a wide variety of profiles and materials – can enhance the cab interior. Choose from round, flat, acrylic, transparent, metal or wood to best accentuate your style.

Our designers and project engineers will work with you to meet your specific needs and preferences.

Lift Solutions brings unparalleled expertise to every project – along with the convenience of a single source for elevator cab, interiors, entrances, doors and fixtures.
