

DOORS & ENTRANCES

That Always Meet the Highest Standards

UL Labeled door panels and entrances are fabricated to meet the highest standards for finish, fit and dimensional accuracy.

Our doors & entrances offer standard and non-standard widths, heights and thicknesses, exotic finishes, glass panoramic, heated sills and more. We focus on providing precision engineered double skinned doors made from 14 gauge steel, to maintain the original look and feel of your doors for years to come.

120” DOORS & ENTRANCES

We provide most door and entrance sizes available for elevator projects nationwide, including door heights up to 120”. Fire rated, UL Labeled and code compliant, our doors are top quality with competitive pricing.

SecureSlide™

SecureSlide™ creates a faster method to install entrances. It allows mechanics to safely install from inside the hall instead of on a running platform in the hoistway. SecureSlide™ is a great option for high rise buildings.

ADVANTAGES

- UL Labeled up to 120”
- 14 gauge steel
- CSA Certified
- Pre-assembled and ready to install option
- Knocked down for shipping is optional
- Welded ribs
- 3/8” bar-stock header is optional
- Swing doors available
- Vision panels available
- Reinforced clutch & pick-up roller plate

MULTIPLE CONFIGURATIONS

We build our doors and entrances to meet any door operation including single, two and three speed for side slide, center opening and swing door configurations.

RANGE OF FINISHES

We offer a full range of finishes for our door panels.

Our finishes include primed, painted, stainless #4 & #8, bronze and muntz #4 & #8, 5WL vandal resistant and with brushed, polished or mirrored surfacing.
