Car Stations

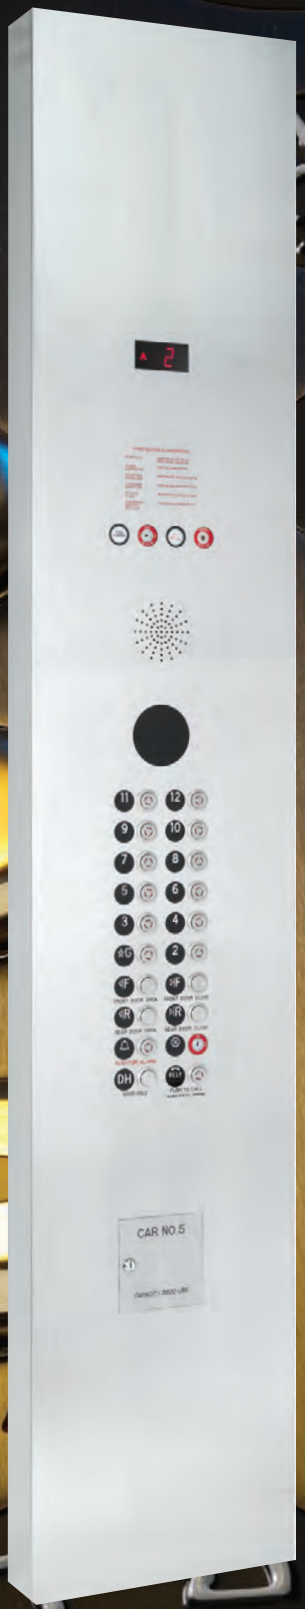

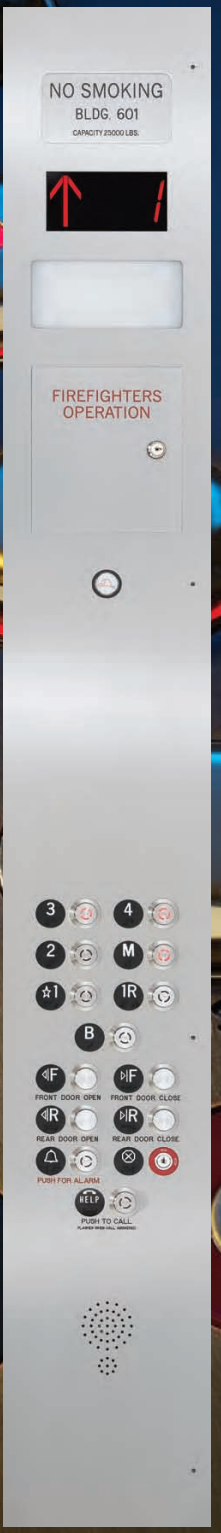

Car Stations

ERM Car Stations are the epitome of elegant design and quality craftsmanship. They are available in standard configurations or can be custom built. All feature screwless covers and multi-volt LED illumination. COPs are completely wired and tested when ordered with ERM's Serial Link System. Optional pre-wiring is available for non-ERM controllers. Available in #4 or #8 stainless steel or Muntz, plus a multi-grain stainless version for high vandal applications.

Swing Returns

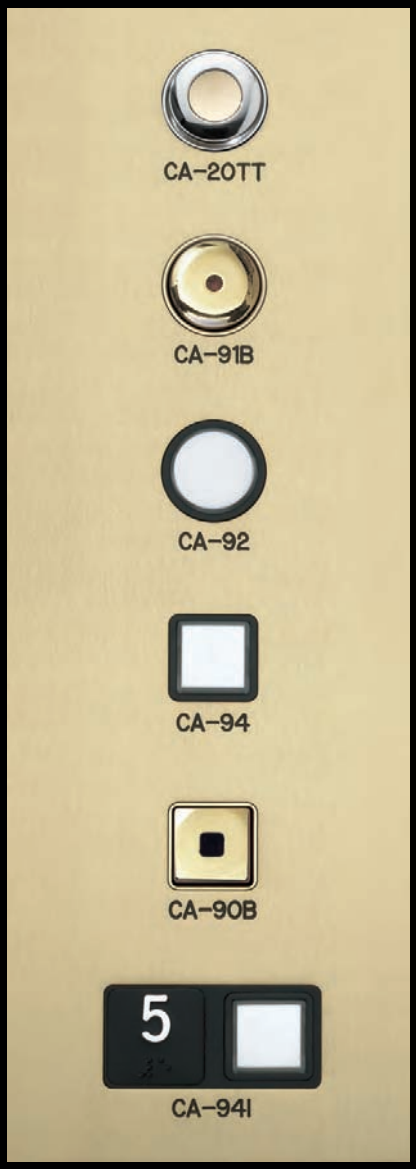

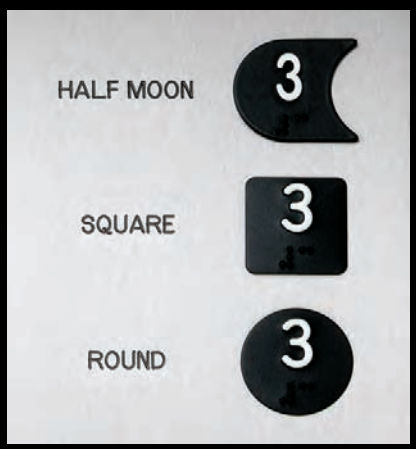

Full Length Swing/ Mini Pull Out Returns

ERM Swing Panels can be fabricated to suit existing elevators. They can be bent to suit existing swings or required dimensions, and to make use of existing latching mechanisms. Full length tilt down panels are available. Finishes include #4 and #8 stainless steel and Muntz.

Buttons/Braille

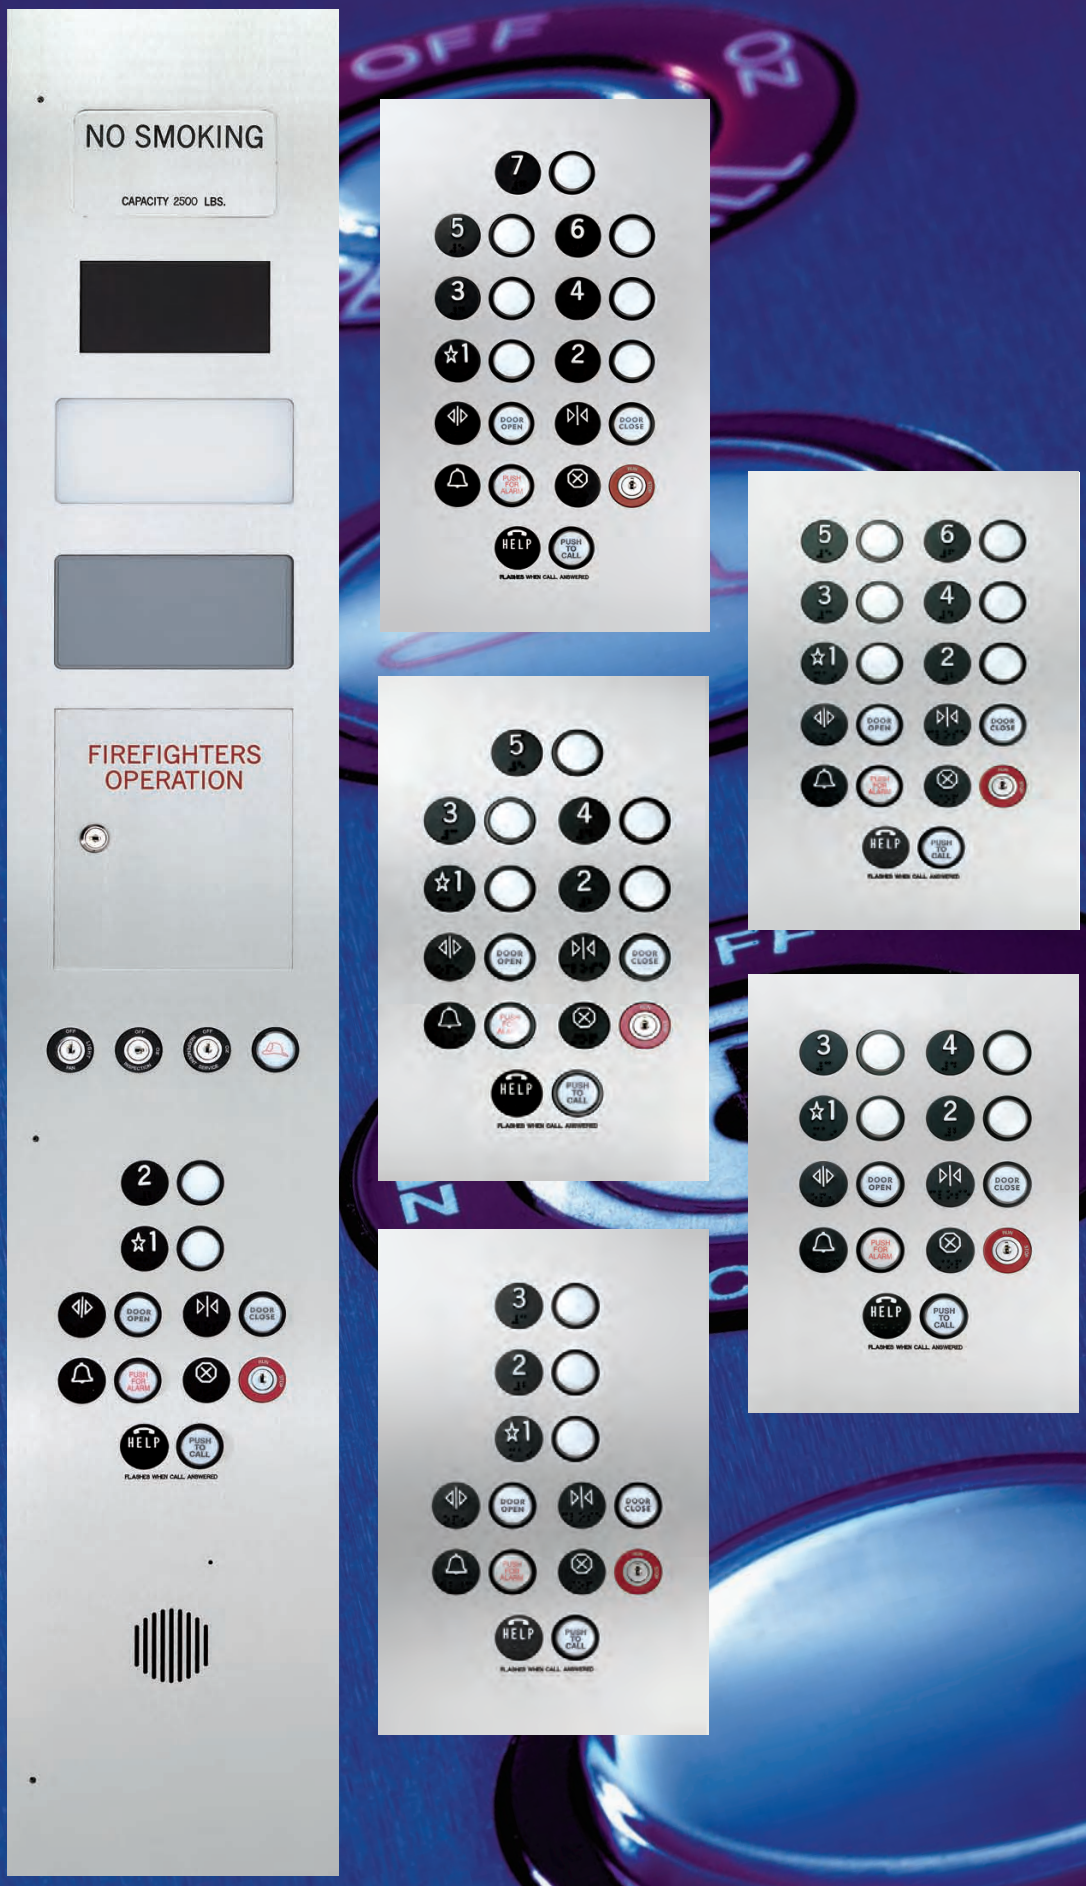

Buttons/Braille

Pushbuttons are available in a myriad of style and color choices to suit practically any application, including many button/braille combinations. Our illuminated buttons feature multi-volt LEDs, and, except for CA-20SS, have self-wiping contacts. Low profile contact blocks are available to fit existing applications. All ERM Pushbuttons meet ANSI and California codes.

Standards

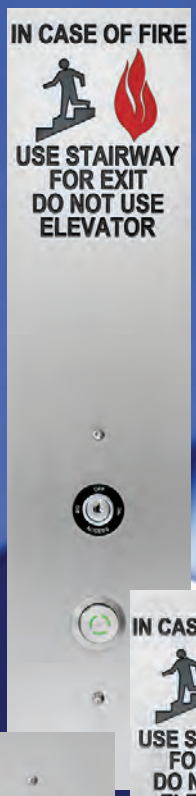

Standards

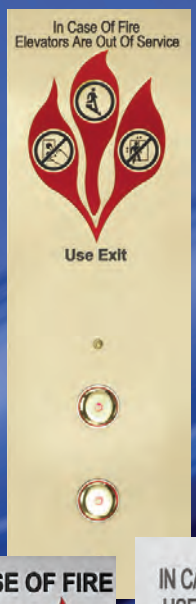

Standards, in #4 stainless steel, are available in 2-7 stop configurations. No engineering is required and they can be manufactured with minimal lead time. Quick and easy approvals are available via fax or email. Featuring CA-92 pushbuttons, standards are available with red, blue, green or white multi-volt illumination. 2004 and 2007 code requirements are available.

Hall Stations

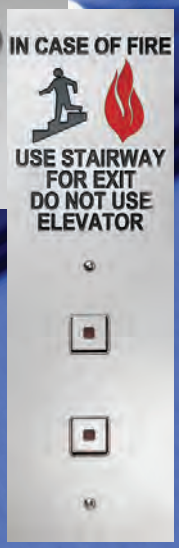

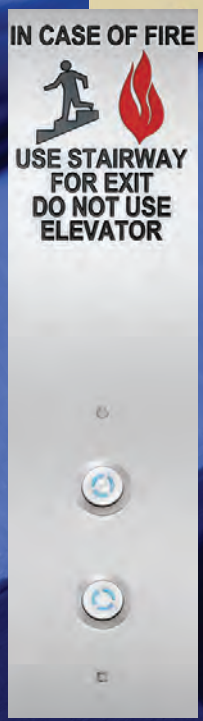

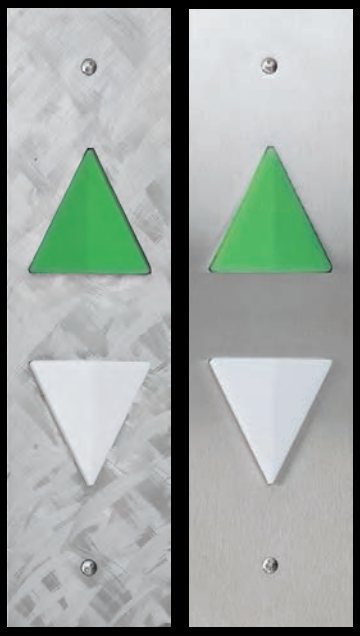

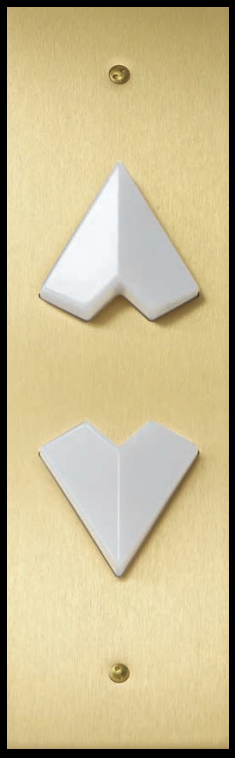

Hall Stations

Stations are available flush or surface mounted. All edges are smoothed during our unique manufacturing process. Multi-volt LED illumination is a standard feature with digital indicators available as an option. Available in #4 or #8 stainless steel, Muntz, or a multi-grain stainless steel for high vandal applications.

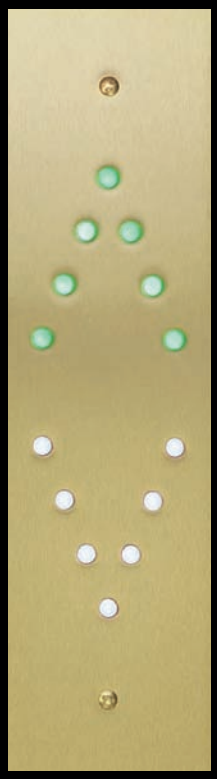

Lanterns

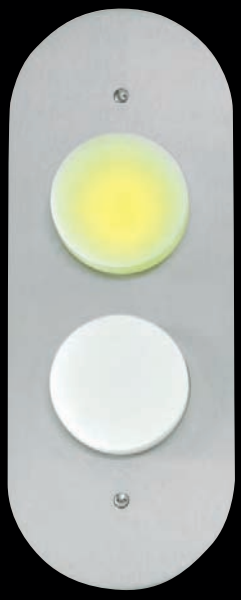

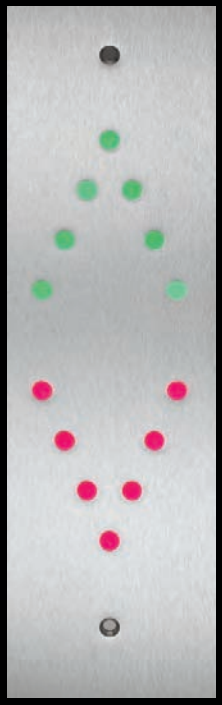

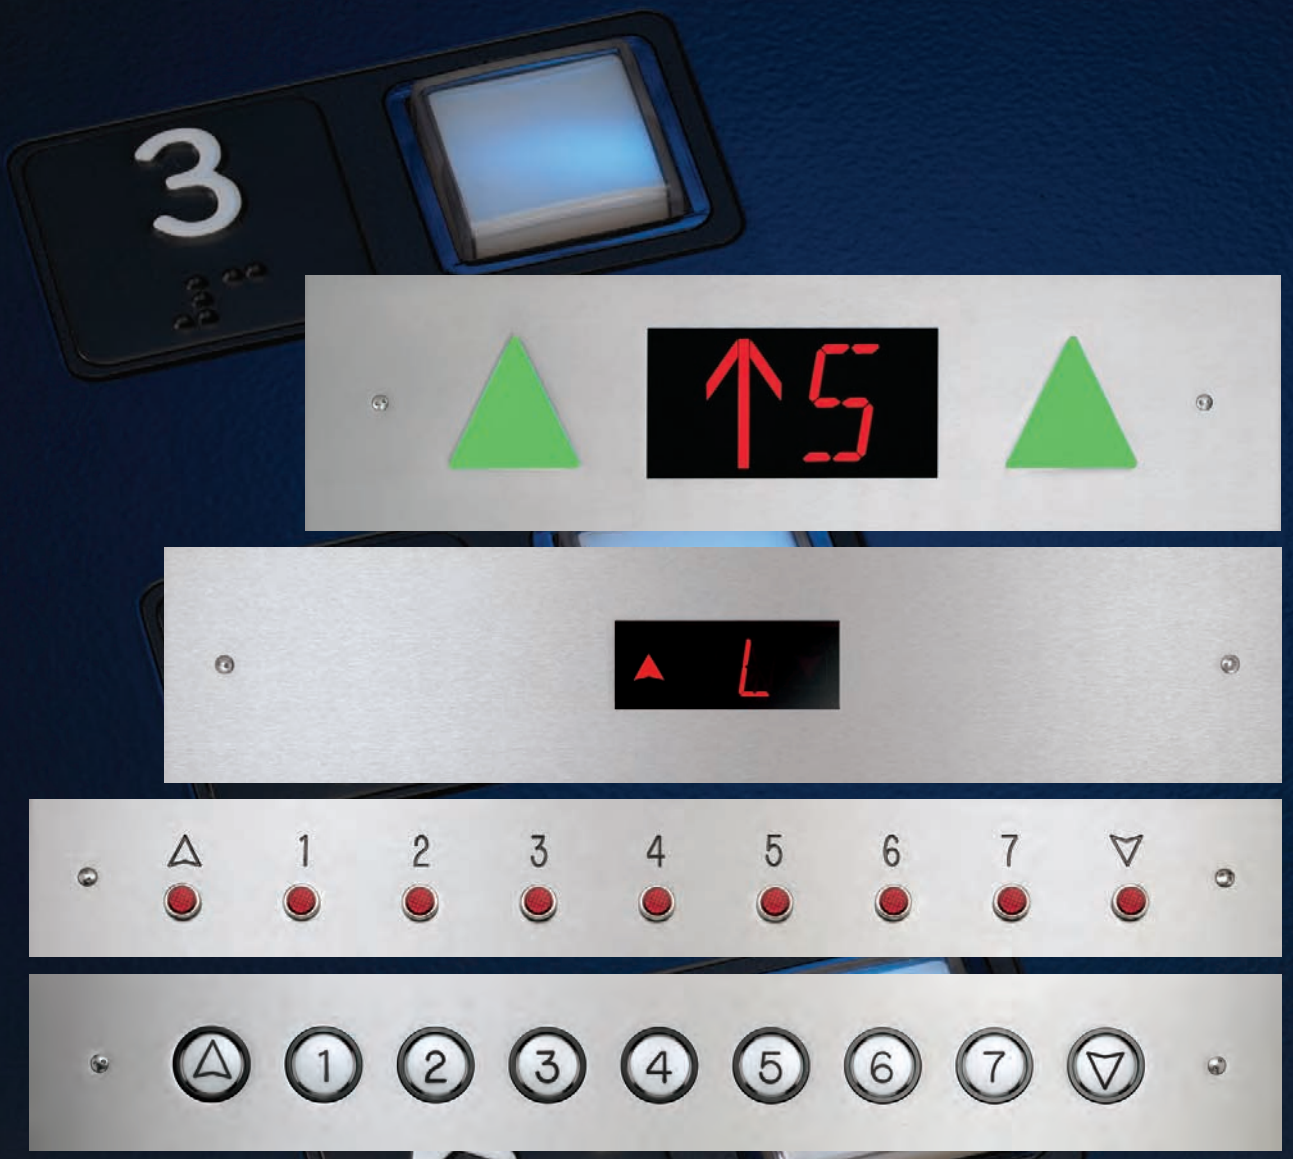

Lanterns

Choose from four distinctive standard lantern styles with LED illumination and multi-volt dual stroke chimes, or choose from an array of optional digital lanterns and custom displays to suit any application. Available in #4 or #8 stainless steel or Muntz, plus a multi-grain stainless version for high vandal applications.

Position Indicators

Position Indicators

Multi-volt Position Indicators are available with LED illumination, and in a wide variety of digital versions. Drivers can be supplied as a stand-alone option or incorporated into the selected controller. Available in #4 or #8 stainless steel, Muntz, or a multi-grain stainless steel for high vandal applications.

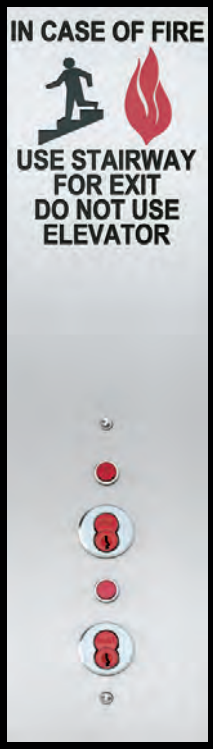

Special Items

Special Items

ERM is renowned for innovative panel and plate customization. Combination finishes and antique finishes, as well as layered COPs and Hall Stations add unique and distinctive features to any project.

Elevator Research & Manufacturing Corp. (ERM) began operation in Los Angeles over 40 years ago, fabricating elevator fixtures, controllers and fittings for a burgeoning construction industry in the rapidly growing metropolis.

Based on the sound principles of providing a superior product as well as unrivaled customer service, the company has grown to become one of the country's premium providers of elevator control stations and custom signal fixtures.

Today, ERM is an acknowledged leader in the industry, providing state-of-the-art electronic solutions coupled with elegant, cutting-edge designs, while maintaining – as it was from the very beginning – an unsurpassed dedication to fulfilling our customers' needs.
